COMPREHENSIVE CARE AND SUPPORT MANAGEMENT SOFTWARE

Cygnum is a fully integrated, enterprise-scale software solution that helps care providers offer quality personalised care more efficiently. From enquiry and referral, care planning and resource allocation, through to contracts, time-sheeting, billing and pay, Cygnum streamlines, organises, automates and updates processes and information right across your business.

Cygnum builds on a 25 year heritage, and is trusted now by a broad range of care providers across the public, not-for-profit and private sectors. The solution is highly adaptable, capable of flexing to change rapidly and effectively, whilst never sacrificing the support of high quality care provision.
