

InView EXPRESS

InView Express is an NHS data warehouse that is now available specifically for CCGs and has been developed in partnership with NHS Heywood Middleton and Rochdale CCG.

InView Express brings together data from the Secondary Users Service, Service Level Agreement Manager, Unify2 and the Quality and Outcomes Framework, as well as national benchmarking, local primary care, commissioning and social care data.

Built with ease of use in mind, the solution provides powerful visual dashboards to fully engage GP practices, commissioners and social care analysts, whilst offering predictive analysis capabilities that use historical data to drive informed decision-making.

FEATURES

-  Integrated data from multiple sources
-  Out of the box for rapid deployment
-  Fully managed cloud hosting
-  Deployed in an N3 secure data centre

BENEFITS

-  Supports 'Better Care Together' & 'STP' initiatives
-  Insight into Long Term Conditions
-  Easily review patient pathways
-  Powerful visualisation through your toolset of choice
