NHS PATIENT LEVEL COSTING SOLUTION FOR END-TO-END REPORTING AND MANAGEMENT

Embedded with market leading analytics

Secure web browser access

Fast calculation times

Full cost traceability

Exception analysis with full audit trail
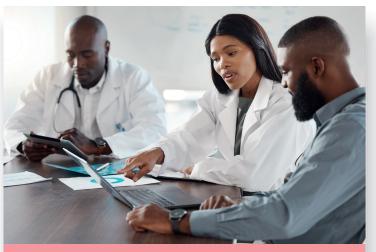

Costed patient activity mapping

NHS trusts are being challenged with identifying inefficiencies and cost improvements at an accelerating rate in order to improve their services. Synergy4 is empowering NHS trusts, from costing teams to clinicians, to unlock insights using their patient-level costing data. With an intuitive web interface and embedded market-leading analytics, Synergy4 allows you to allocate, review and visualise costs and income at a patient level. This high-performing and secure solution provides fast calculation times, exception analysis with full audit trails and patient activity mapping. With Healthcare Costing Standards configured and maintained by CACI, we ensure users can focus their time on analysis and insights. At CACI, we believe your costing solution should go beyond National Cost Collections. Synergy4 helps you achieve those objectives and much more. Whether your trust has acute, mental health, community or ambulance needs, or is a fully integrated care organisation, Synergy4 enables you to access insights that inform you how all service lines across your care system are delivered and improved for the future.

Costing Team
Owns the process and solution

Senior Finance Management
Identifies opportunities for financial improvements

Data Analyst
Uses analytics tools and datasets to support the costing team with generating insight

IT and Governance
Ensures all solutions are secure, and meet IT governance rules and compliance

Clinicians
Give the best patient care possible, and identify opportunities to improve patient outcomes
