

Distribution network planning made easy

Pin Supply Chain is a strategic distribution network modelling solution designed to help you analyse and manage your supply chain more effectively and increase profitability.

How Pin Supply Chain can elevate your logistics operations

Carry out network optimisation, what-if modelling and sensitivity analysis to answer the following questions:

What should my supply chain look like?

Where should they be located?

How many distribution points are required?

How much capacity do they need?

You can get quick and easy data-driven answers to your questions in the following scenarios:

Natural expansion over time

Pitching to win new contracts

Growth through sales and marketing

Mergers and acquisitions

Moving into new geographical areas

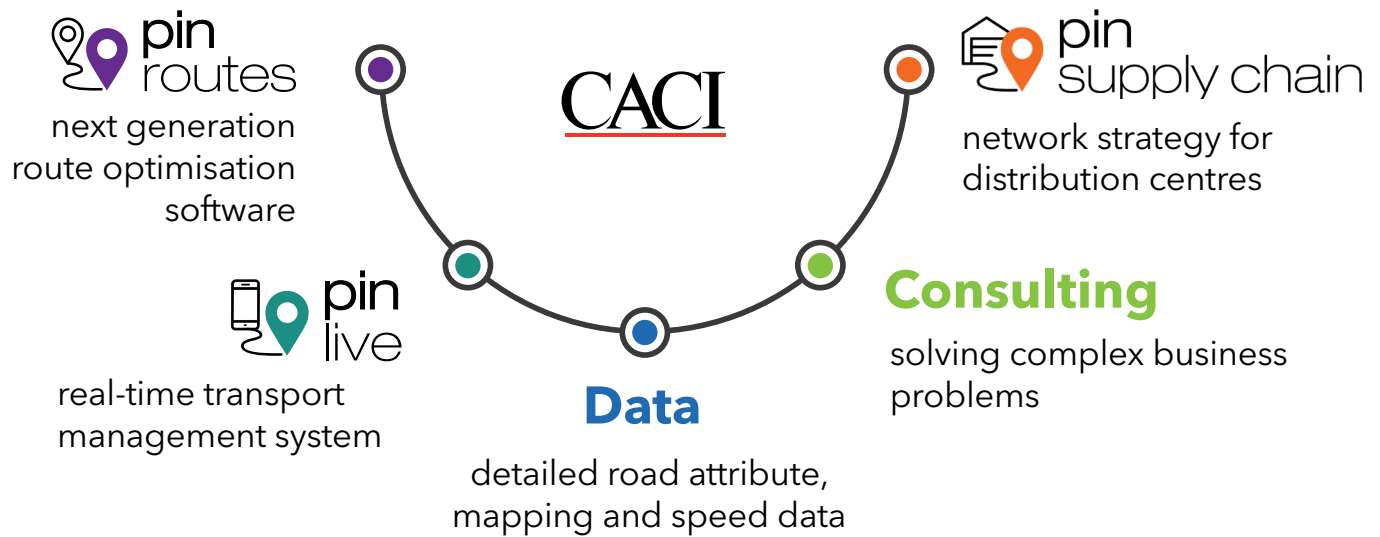

Contraction

Need for relocation (expiring leases, not fit-for-purpose)

Your roadmap to a more efficient logistics operation

Pin Supply Chain is part of the CACI Logistics family. Our sophisticated tools combine to provide the most comprehensive and powerful solutions to those responsible for managing a logistics operation.
